SUMMARY BUDGET JUSTIFICATION INFORMATION  20
ATTACHMENT 1: CERTIFICATION OF A MAJOR PROJECT  22
SUBJECT: Assistance for Preparing Budgets for Sponsored Program Proposals

It is very important to understand that the budget of a Sponsored Project includes direct as well as facilities and administrative (F&A) costs. Direct costs are those easily identified as allocable to a specific project, such as salaries, employee benefits, supplies, and travel. F&A costs are those not readily identifiable with the project, such as administration, building space, equipment use, utilities, janitorial service, accounting, etc. Direct and F&A costs are incurred for all projects and together make up the total project cost.

OGRD recommends using the provided excel spreadsheets to develop budgets for sponsored project. See the links for the appropriate spreadsheet at http://www.ogrd.wsu.edu/guidelines.asp, Document #2 Budget templates.

As well, any budget prepared for a sponsored project must be approved or developed by an individual whom has completed the courses offered on sponsored project budgeting through WSU’s HRS Research Administration Series or through OGRD. Individuals completing this course will be considered “certified” by WSU to prepare sponsored project budgets and will be given the authority to have their budgets accepted without detailed scrutiny by OGRD. Budgets without approval from a Certified Budget individual will be scrutinized and may be rejected until appropriate corrections and/or certified approval has been given.

PROPOSAL REVIEW

Budget Approval

You may obtain OGRD budget approval in one of two ways:

Many colleges and departments have research administrators with OGRD budget approval; please check with your area fiscal officer prior to sending your draft budget to OGRD; you may be able to obtain an approved budget from your departmental research administrator.

You may e-mail or FAX (509.335.1676) the draft budget to your Grant & Contract Coordinator. If you do not know which Coordinator is assigned to your area, please call OGRD (509.335.9661) to be directed to your Coordinator. Your Coordinator will review your budget and return the approved budget to you as soon as possible. If there are questions, the Coordinator will call you for clarification.

Please wait for OGRD budget approval before you finalize your budget and make copies as there may be necessary changes.

Note: If you are a departmental research administrator, and would like to obtain OGRD budget approval, please call OGRD at 509.335.9661 for more information.
Deadlines

Please see that your draft budget is submitted to OGRD a minimum of one week prior to the proposal due date. Agency deadlines often overlap, creating a situation where many budgets and proposals are reviewed by OGRD within the same week or even the same day. OGRD requires adequate time to allow for processing of all requests.

Information Needed for Budget Approval

Make sure that your draft budget clearly identifies the following information: (1) PI(s) name, (2) Awarding Agency, (3) RFP/RFA/PA Number (if applicable), (4) Proposed Project Period, (5) Full First Name, Middle Initial, and Last Name of each employee listed on the Budget (if known), (6) All direct costs for the proposed project as well as F&A costs at the applicable rate. This information will be used to verify salaries, benefits and other budget data.

(Back to Table of Contents)

SALARIES AND WAGES

Faculty and Administrative/Professional

Use the current faculty salary amount with an estimated 4% increase effective July 1 of each year thereafter. If a WSU faculty member will only be consulting on a project, it will still be calculated as a percentage of the appointment.

The current faculty salary shall be defined as the full-time monthly base salary without stipends or ADRs (Added Responsibility/Administrative Stipend) as outlined in WSU BPPM section 60.25 under Payroll.

Please note: The Controller’s Office has pre-approved and pre-authorized, for any faculty member who holds an administrative post, i.e., Chair or Director Position, the option to include their Added Responsibility (ADR) pay when budgeting for a sponsored program proposal. Adding the ADR constitutes a pre-approved exception to the following:

The standard process of using the WSU full-time monthly base salary definition normally calculated when budgeting for proposals, as outlined in this section. The principles outlined in the Cost Accounting Standards 501 rule related to consistency in estimating, accumulating, and reporting costs.

The budget will need to explicitly and separately budget for the ADR in the proposal. Upon award, and to properly follow CAS 501 for expending and reporting these funds as budgeted, it will be important to work with the Sponsored Programs Services office to properly complete any Budget Office position forms (EAA’s, PA’s, etc.) to ensure that faculty certified effort matches proposed effort. This may or may not require a manual adjustment to the WSU Effort Certification System.

Lastly, OGRD Guideline #21 should be followed for Excess Compensation outside the parameters noted above or you may contact OGRD.
Compensation in excess of full time base salary may not be paid from a sponsored
project unless it is specifically identified as such and requested from the agency in the
proposal and approved according to the guidelines in the WSU Faculty Manual and
OGRD Guideline #21. Excess Compensation approval must be obtained prior to
submitting the proposal.

Note: Compensation above full time base salary is allowable without the prior approval
required for typical excess compensation if the increase is due to hazardous or
dangerous conditions related to overseas research, these costs are not disallowed by
the sponsor, and they are clearly identified as such in the budget/budget justification.
This type of compensation is often referred to as Post Hardship Differential or Danger
Pay. These costs must be reasonable and treated consistently. You may wish to
consult the U.S. Department of State Summary of Allowances and Benefits webpage for
more specific language and explanation of these items as well as other allowances and
costs that may need to be built into international research project budgets. Again, these
costs must be treated reasonably and be allowable by the sponsor. For further detail
related to international sponsored project budgets please see the webpage located at
http://www.ogrd.wsu.edu/international.asp.

University policy permits WSU faculty on academic-year appointment to request summer
support for up to three months from a granting agency provided this is consistent with
the guidelines of the agency and the policy in the faculty manual is followed. Such
support should be calculated at 1/9th of the academic-year support. In the event that
three months are requested, the individual is expected to be at work every day with the
exception of weekends and university holidays.

Note: Some agencies, such as NSF and NIH, have salary and appointment limits
associated with types of appointments. Please make sure you review the Request for
Proposal (RFP) and associated agency policies when preparing your draft budget.

Example: NIH published information regarding the salary limitations for NIH awards
effective January 1, 2009. Please see http://grants1.nih.gov/grants/guide/notice-
files/NOT-OD-11-067.html for complete information, such as, NIH will only allow a 2%
yearly increase for salaries effective July 1 of each year.

The DOD (Dept. of Defense) encourages faculty to distribute their salary over the entire
year, and not just in the summer months. This will generate accruals that can pay for
summer faculty salary and will more closely reflect actual effort to the project. If work is
done in the summer then a possible adjustment to the payment schedule could be in
order so as not to be red flagged for unspent funds.

Retiree Reemployment

According to the Retirement Plan Rules and Regulations from WSU's HRS, retiree
reemployment means the reemployment of a former Participant up to forty percent of full
time following the date of retirement under Section 6.1 (for purposes of this Section,
such individual is a "reemployed retiree"). A reemployed retiree's maximum salary will be
calculated at forty percent of the retiree's average monthly basic salary paid during his or
her highest two consecutive years of full-time service.

Note: Information regarding the Retirement Plan Rules and Regulations can be found at
the following site:

Page 4 of 22
April 26, 2011
Person Months

There are agencies (NSF, NIH, etc.) which require the PI, faculty and other senior personnel to report the amount of time spent on a project in Person Months. A person month is the metric used to report this time rather than reporting it as a percentage of time and effort (%FTE). The effort is based on the type of appointment of the individual with their organization; e.g., calendar year (CY), academic year (AY), and/or summer term (SM); and the organization's definition of such. For instance, some institutions define the academic year as a 9-month appointment while others define it as a 10-month appointment. WSU defines the academic year as a 9-month appointment.

To calculate percent of time and effort to person months, use the “Person Months Calculator” worksheet on the OGRD Budget Template at http://www.ogrd.wsu.edu/guidelines.asp. For more information on the usage of person months, please go to http://grants.nih.gov/grants/policy/person_months_faqs.htm#q4.

Classified Staff

Calculate classified staff salaries at Step L of the associated range for the position title listed on the proposal budget, calculating an estimated 4% increase each July 1. Appropriate salary ranges and steps for each Classified Staff Job Title can be found on the HRS website at http://www.hrs.wsu.edu/Class-Comp+Plans. Classified staff salaries shall be defined as the full-time monthly salary without differentials for classified staff as outlined in WSU BPPM section 60.25 under Payroll. Refer to the Classified Staff Schema and Salary Schedule.

Administrative and clerical staff salaries are normally part of F&A costs and should not be direct charged to a grant or contract. However, direct charging of these costs may be appropriate where a major project or activity is involved where the individuals are specifically identified with the project or activity. Please see the “Major Project” section for complete information.

Post-Doctoral Candidates/Research Associates

If the position is a newly hired employee, contact your departmental research administrator for a normal beginning salary range for these positions; add an estimated 4% increase effective July 1 each year.
If the salary is for a person already in the position, follow the same procedures as for faculty.
Note: Some agencies, such as NIH, have salary caps for these types of appointments. Please make certain you review the RFP and associated agency policies when preparing your draft budget. The NIH salary caps for Post-Doctoral Candidates can be found at the following site:

Graduate Research Assistants

Use the current matrices for Graduate Research Assistantship Appointments for all proposals, with the exception of proposals that are for the College of Science or include assistantships for DVM, Nursing, PharmD, and MBA assistantships; include an estimated 4% increase on all but QTR each July 1. QTR has separate inflation rates for each type of assistantship offered, please see the OGRD Budget Template for further guidance on inflation rates. For the assistantships with individual QTR inflation rates, graduate matrices can be found at [http://www.ogrd.wsu.edu/guidelines.asp](http://www.ogrd.wsu.edu/guidelines.asp). **Note:** If you wish to hire a Graduate Research Assistant at a higher level than the minimum step listed on the matrices as listed above, use Graduate School Document No. 12 and the Assistantship Salary Grid (located at [http://www.gradsch.wsu.edu/graddoc.htm](http://www.gradsch.wsu.edu/graddoc.htm)). Calculate salary with a 4% increase each July 1. The minimum steps for GRA Appointments are as follows:

- STEP 26 for Masters Candidates
- STEP 32 for PhD Candidates
- STEP 42 for College of Sciences Masters Candidates
- STEP 47 for College of Sciences PhD Candidates
- STEP 49 for College of Pharmacy Masters Candidates
- STEP 60 for College of Pharmacy PhD Candidates

Graduate Research Assistants cannot be appointed for partial semesters; if you are requesting funding for a partial semester, you are responsible for committing other funds outside of the grant to cover the remainder of the partial semester funded by the grant.

**Note:** There is a second type of appointment similar to the Graduate Research Assistant, but titled Graduate Project Assistant. This position is typically appointed at a higher step than a Graduate Research Assistant, but is not QTR eligible. See [Graduate Appointment Processing](http://www.gradsch.wsu.edu/) document for more information on appointment types.

Wages/Temporary Employees

Use hourly rates as appropriate for the type of work performed within the guidelines issued by Human Resource Services. You may or may not choose to use a 4% increase effective July 1 each year; this is your decision. You can find the hourly rate ranges by title at [http://www.hrs.wsu.edu/Class-Comp+Plans](http://www.hrs.wsu.edu/Class-Comp+Plans).

**NOTE:** If existing personnel are being used, show their names. If a position is to be filled by a new hire, please indicate this on your budget.

(Back to Table of Contents)

**FRINGE BENEFITS**

Staff, Faculty, and Research Associates

Faculty, Post Doctoral/Research Associate(s), and Staff benefit rates can be found on the current budget template at [http://www.ogrd.wsu.edu/guidelines.asp](http://www.ogrd.wsu.edu/guidelines.asp) under “Budget Template”. These are the current estimated rates provided to OGRD by the budget office; these rate(s) are updated on a regular basis.

If you have reason to believe the current rate is too low for an individual in your budget, please contact OGRD; we may need to calculate actual benefits in some cases.
Note: Faculty are required to make TIAA/CREF payments for summer appointments from grant funds. The grant budget must also include the WSU contribution paid toward employee benefits.

**Retiree Reemployment.** Retirees who have been re-employed will be allowed benefits including OASI, Medicare, Medical Aide, and Unemployment. The estimated rates for these benefits should be calculated with a rate of 9%.

**Graduate Research Assistants.** GRA benefits include Medical Aide, Qualified Tuition Reduction and Health Insurance.

**Medical Aide.** Graduate Research Assistant Medical Aide benefit is calculated at 1.5% of salary.

**Qualified Tuition Reduction.** Use the Matrices for Graduate Research Assistantship to locate the appropriate rate of QTR based on the GRA appointment start date. Use a 5% increase for each subsequent year for QTR. For DVM students use a 7% rate and for PharmD, MBA (Pullman campus only), and Nursing students use 10%. For a single semester, use one half of the amount listed for a 9 month appointment.

**Health Insurance.** Use the Matrices for Graduate Research Assistantship to locate the appropriate health insurance rate based on the GRA appointment start date. Use a 4% increase for each subsequent year. For a single semester, use one half of the total amount for one year.

Note: Health insurance is paid during the academic year only. Summer coverage is through the premium paid the semester prior to summer appointment. If a GRA is appointed with a summer start date, he/she is not covered for that summer.

**Time Slip Employees.** There are many types of time slip employees; each type has a different fringe benefit rate. Please refer to the budget template at [http://www.ogrd.wsu.edu/guidelines.asp](http://www.ogrd.wsu.edu/guidelines.asp) for current rates.

Full-time Student Time Slip
*OGRD standard use of time is based on a sixteen (16) week semester.

Part-time Student Time Slip

**Non-student Time Slip (Temporary)** benefits are calculated depending on the number of hours they work and how many months of work during a 12 month period. Benefit rates are based on amounts with or without PERS, health and medical insurance. These benefit rates vary for the following:

-If time slip will work less than 70 hours a month and not more than five consecutive months (No PERS or Health)

-If time slip will work 70 or more hours per month in any five months of a 12 month time frame (PERS with no Health)

-If time slip will work at least six consecutive months at least part-time (PERS, Health, and Medical)
Employees who work 480 hours or more over a consecutive 6 month period become benefit eligible at the beginning of month 7. Note: An employee must report a minimum of eight hours in month 7 to receive the insurance benefits. After establishing eligibility, if an employee does not work a minimum of eight hours in any month, the employee will lose benefit eligibility and must reestablish eligibility by working a minimum of 480 hours or more over a six consecutive month period.

EQUIPMENT

Capital Equipment. Only individual items costing $5,000 each should be listed as capital equipment. Cost estimates should include sales tax and shipping; identify each piece of equipment with a corresponding cost.

Please note that while high end software may cost over $5,000 per item, software purchases are almost always a license for use and therefore categorized under object 03 – Goods & Services, software is only included in capital equipment if it is embedded in the hardware of an item of capital equipment. If you have questions about whether or not a specific item should be defined as capital equipment, please contact your budget person or OGRD Coordinator for assistance.

Non-Capital Equipment consists of non-expendable equipment costing between $500 and $4,999 per item. Cost estimates should include sales tax and shipping; identify each piece of equipment with a corresponding cost.

Note: Object 16 is no longer utilized for non-capital equipment with the exception of Property Inventory Items less than $5,000 that are determined to be ‘Small and Attractive’; e.g., licensed vehicles, firearms and laptops (regardless of cost). Please refer to BPPM 20.50 and 20.51 for the criteria. Object 03 Materials and Supplies is the budget allocation object for all non-capitalized equipment that does not apply to these criteria.

Tax Exemption for Research Equipment. Per BPPM 70.42, equipment over $2,500 per item may qualify for tax exemption under Washington State RCW 82.08.02565. For more information on criteria for this tax exemption, please see BPPM 70.42. If you still have questions as to whether or not to budget for taxes for a specific item of equipment, please contact Purchasing Services at 335-3541.

Other Equipment Related Costs. Other considerations to include in estimating project costs related to equipment:

Installation and start-up costs

Contact Physical Plant for estimated charges related directly to setting up or accommodating equipment use above and beyond typical Physical Plant services.

Contact Facilities Planning for estimated charges for consultation on construction or alteration of capital facilities when it is necessary to allocate new university space to the project.
If the equipment is already available on campus, make sure to provide an adequate explanation for the need for duplication in the proposal budget justification.

Budget costs for necessary maintenance, repair, or upkeep of equipment (including Maintenance Service Contracts) which neither adds to the permanent value of the property nor appreciably prolongs its intended life, but keeps it in an efficient operating condition. These costs should be budgeted in Object 03. Contact the Purchasing Department for further information on Maintenance Service Contracts.

**Federal Policy Regarding the Purchase of Equipment.** Most federal agencies will not provide funds for the purchase of general purpose office equipment. If these items have been budgeted as a direct cost through a purchase or rental, please read the “Major Project” section for further guidance.

*(Back to Table of Contents)*

**TRAVEL**

Check with local travel agencies for transportation costs.

Domestic per diem rates, mileage rates, rental car and motor pool rates are listed on the Travel Services website at [http://www.wsu.edu/travel/](http://www.wsu.edu/travel/).

Foreign Travel per diem rates can be found at: [http://www.state.gov/m/a/als/prdm/2004/36628.htm](http://www.state.gov/m/a/als/prdm/2004/36628.htm) or by calling WSU Travel Services at 509.335.2034. Please see the “Additional Information” section for further guidelines related to foreign entities.

Inflation of travel costs is suggested at 4% per year, but not mandatory.

Always provide detail breakdown of estimated travel expenditures.

Agencies often request budget detail at the time of proposal review. Keep in mind that a lump sum travel estimate without destination and detailed cost breakdown may delay the award process.

*(Back to Table of Contents)*

**MATERIALS & SUPPLIES**

Principal Investigator’s should use their best estimate or a catalog price, plus tax and shipping costs for each item.

Inflation suggested at 4% per year, but not mandatory.

Individual components to be used for equipment fabrication should be identified as such. This can be separately budgeted and F&A will not be assessed to these costs.

“Project/Lab” supplies should be coded as 03AC; supplies that are coded 03AA on the BALANCES system must be allocable to that particular sponsored project, please see the “Major Project” section for further guidance.

*(Back to Table of Contents)*

Page 9 of 22
April 26, 2011
PUBLICATION and PRINTING COSTS

Publication costs include the costs of printing (including the processes of composition, plate-making, press work, binding, and the end products produced by such processes), distribution, promotion, mailing, and general handling. Publication costs also include page charges in professional publications. Principal Investigator’s should use their best estimate for publication costs related to the project.

If Publication costs are not identifiable with a specific project, they should not be allocated as a direct cost, they are considered as an indirect cost.

Page charges for professional journal publications are allowable as a necessary part of research costs where:
The research papers report work supported by the Federal Government and the charges are levied impartially on all research papers published by the journal, whether or not by federally sponsored authors.

Contact WSU Publications or Mailing Services for pricing and estimated cost information.

Inflation suggested at 4% per year, but is not mandatory.

(Back to Table of Contents)

CONSULTANT SERVICES

Consulting that cannot be accomplished by existing departmental staff or university service departments may be obtained from firms or individuals outside the university on a fee for service or contract basis, provided a proper request is made and approval obtained PRIOR to rendering of the service, whether WSU or agency approves. Consultant fees are a separate category of direct costs and are not listed as part of the personnel budget. Specific provisions should be made in proposals for the compensation of consultants who are vital to the success of the proposal.

Washington State Employees as consultants on proposal budgets:
Provisions made for payment of consultant fees to any member of the Washington State University staff must comply with existing regulations (see OGRD Guideline #21 – Excess Compensation). Essentially, such compensation is rarely allowed and only under exceptional circumstances. No consultant fees may be paid to federal employees from federal grants or contracts. Personal Service Contracts have specific statutory requirements that must be addressed. WSU is required to file all object 02 (Personal Service Contracts) with the Office of Fiscal Management in Olympia ten days prior to the start date of the contract. For details and procedures, please contact the Purchasing Department.

The National Science Foundation has recently changed their policy on consultant rate fees. Please review the document at http://www.nsf.gov/bfa/dias/policy/docs/consultantfaqs06.pdf to ensure correct consultant rates are charged.

Inflation suggested at 4% per year, but not mandatory.
COMPUTER SERVICES

Call the Computing Center (509.335.4357) for estimates based on type of job, CPU time, etc.

Inflation suggested at 4% per year, but not mandatory.

Note: The School of Electrical Engineering and Computer Sciences uses 1.5% TDC on all proposals.

SUBAWARDS

Work and/or services which can be performed by WSU should be handled as such when at all possible as recommended by federal agencies. (see example in NSF Proposal and Award Policies and Procedures Guide located at: http://www.nsf.gov/publications/pub_summ.jsp?ods_key=papp).

Have each sub-recipient prepare and submit a detailed budget and letter of support/commitment approved by the appropriate administrator/administrative office for that institution. This documentation needs to be submitted with the proposal to OGRD.

List each sub-award as a separate line item. Calculations on budgets submitted by sub-recipient should be checked for errors.

If the sub-recipient is requesting F&A costs, include the F&A costs in the total with sub-recipient direct costs as one line item on the WSU budget.

A sub-recipient will not be required to establish an F&A rate if the organization’s total operations consist of a single grant-supported project or if the organization appropriately and consistently treats all costs as direct costs to projects and accounts for them as such. In the latter case, WSU must be satisfied that the organization’s accounting system can adequately identify and support all costs as direct costs to the project. (For WSU procedural support see NIH’s “Cost Considerations” at http://grants.nih.gov/grants/policy/nihgps_2003/NIHGPS_Part5.htm#_Toc54600118). This includes being able to identify and segregate costs on the basis of a process that assigns costs commensurate with the benefits provided to individual projects (see “Administrative Requirements—Management Systems and Procedures—Financial Management System Standards”).

Inflation rates used by sub-recipients should be in accordance with sub-recipient institution’s normal practices.

Note: OGRD Guideline #22 distinguishes the differences between a subcontract, personal services contract, and purchased service relationship. It is important to understand these differences as the type of contract budgeted for compared to how the work will truly be contracted out will cause significant differences in estimated costs on your budget. For example, facilities and administration costs on subcontracts is higher than a service contract as a subcontract usually incorporates the subcontractors F&A rate. Incorrectly listing a subcontract as a service contract will cause your costs to
overrun after the award comes in should the subcontract be required rather than a service contract.

*(Back to Table of Contents)*

**OTHER DIRECT COSTS**

Any WSU service center used should be shown in the Other Direct Cost category (e.g. Electron Microscopy Center, Lab Animal Resources, etc.). Each center should be contacted by the Principal Investigator to get estimates for services requested.

Note: The Service Center will include an 8% service center administrative service charge in the total with any service center estimate. The 8% service center rate is effective as of July 1, 2008. The previous rate was 6%.

Telephone tolls, photocopy charges, equipment maintenance, conference registration fees, etc. also belong in this category. If telephone equipment/line rental is to be charged to the grant, it should be separately identified here as such and not included as tolls. Such costs are usually compensated as F&A and not as direct costs if federal funding is involved, please see the “Major Project” section for complete information. Effective FY 2007-2008, budgeting for cell phones on federal programs is only allowable if the proposed project meets the criteria of a “major project”, please see the “Major Project” section for complete information. Otherwise, cell phone charges are considered equivalent to other electronic devices that are usually compensated as F&A and not as direct costs. Please also refer to WSU BPPM 85.45 for further information on cell phone use. For proposal budgets being submitted to non-federal sponsors and/or for federal major project proposals, cell phone charges shall be handled in the following manner: Please list the amount of the cell phone and service charges under the “Other Direct Costs” line item. Also, include a 10% benefit rate in the line item (please verify this percentage with your department’s individual benefit rate percentage). A separate calculation sheet should be kept on file to validate the calculation for the line item. (A notation should be made in the budget justification that the university reimburses employees for the specific cell phone and related charges through wages and benefits and the costs associated to these budget items will be paid out as such.)

Some Sponsors allow for the inclusion of Proposal Development Costs, however if the Sponsor is federal this allowance would need to be specifically indicated in the RFP as in the case of NIH’s K awards.

Note: Off-Campus projects (i.e. field work, out of country projects, etc.) that REQUIRE the need for a cell phone may be allowable as a direct cost to a sponsored project. Please provide adequate explanation in the budget justification. These costs may be budgeted as indicated above.

Note: Fees for memberships of Societies, Councils, or other groups to attend a specific conference required by a sponsor within an RFP, may be included as a direct cost in conference expenses.
Stipends and Participant Support Costs:

Definitions:

Stipends: Defined in the NIH Grants Policy Manual as “a direct form of financial support made through a payment to an individual under a fellowship or training grant in accordance with pre-established levels to provide for the individual’s living expenses during the period of the training.” For WSU purposes, WSU BPPM Form 30.30 indicates that stipends are “not considered a wage or a salary and are not subject to federal withholding tax or social security tax.”

Participant Support Costs: The National Science Foundation defines participant support costs as direct costs for items such as stipends or subsistence allowances, travel allowances and registration fees paid to or on behalf of participants or trainees (but not employees) in connection with meetings, conferences, symposia, or training projects. NIH defines participant costs as: “Participants are those individuals who benefit from the proposed research education program. Participant costs must be justified as specifically required for the proposed research education program.”

Budgeting for Stipends and/or Participant Support Costs:

Participant Support Costs: If the project has a special designation for training and/or education programs which allows support of those specific costs through cost categories designated as participant support costs, stipends and related training/education; costs associated to the training/education portion of the project can be budgeted as a participant support costs category under object (08). Examples of this type of program and related budgets are NSF IGERT Training grants, NIH Research Education grants (R25’s).

Note: If the Sponsor indicates they will pay in the form of stipends only, please work with OGRD and/or your department to budget for and manage the costs associated to support the participant or student.

Note: For NSF REU Supplements, departments should budget as requested by NSF within the REU Supplement Guidance at: http://www.nsf.gov/pubs/2007/nsf07569/nsf07569.htm. Upon award, however, the department has the option to allocate dollars to (01) and (07). This is a special situation with REU supplements only. Please work with Sponsored Programs Services to allocate these award funds appropriately.

Inflation for all the above items is recommended at 4% per year, but is at the discretion of the Principal Investigator. For NIH proposals, be sure to check the appropriate NIH Institute to which you wish to apply, for their inflation factors as each NIH institute may have different inflation rates. If the institute has not communicated an inflation factor or the appropriate institution has not been identified, use the standard 4% recommended above.

When there is a possibility that IP (Intellectual Property) will be developed from a sponsored research project, we encourage budgeting in direct costs for IP protection and patent filing costs. For domestic patent applications an estimated cost range from $7,500 to $15,000 is considered acceptable and for foreign patent filings an estimated cost range from $60,000 to $150,000 is acceptable. For more specific numbers we encourage departments to contact the Intellectual Property Office at 509.335.5526.
Radioactive Waste is typically charged as a facilities and administrative cost; the Radiation Safety Office (RSO) is factored into the F&A rate for sponsored projects that involve a “normal” amount of radioactive waste. However, if your project will produce a larger than normal volume of radioactive waste, causing an “unlike circumstance” as defined in OMB Circular A-21, then you should build these costs into your proposal budget as a direct cost. If your project is determined to be an “unlike circumstance” in regards to Radioactive Waste, please contact the Radiation Safety Office (RSO) for a cost estimate for disposal of this waste.

FOREIGN TRAVEL and budgeting when foreign entities are involved: High Risk Insurance information can be found @ http://www.ogrd.wsu.edu/international.asp. This link also gives helpful advice related to budgeting when foreign entities are involved.

(Back to Table of Contents)

MAJOR PROJECT - COSTS ON A FEDERALLY SPONSORED PROJECT

Per Circular A-21, “Major Project” is defined as a project that requires an extensive amount of administrative or clerical support, which is significantly greater than the routine level of such services provided by academic departments. Some examples of major projects are listed below. These examples are not exhaustive nor are they intended to imply that direct charging of administrative or clerical salaries would always be appropriate for the situations illustrated in the examples. For instance, the examples would be appropriate when the costs of such activities are incurred in unlike circumstances, i.e., the actual activities charged direct are not the same as the actual activities normally included in the institution’s F&A cost pools, or, if the same, the indirect activity costs are immaterial in amount. It would be inappropriate to charge the cost of such activities directly to specific sponsored agreements, if in similar circumstances, the costs of performing the same type of activity for other sponsored agreements were included as allocable costs in the University’s F&A cost pools. (OMB Circular A-21, Exhibit C)

- Large, complex programs such as General Clinical Research Centers, Primate Centers, Program Projects, environmental research centers, engineering research centers, and other grants and contracts that entail assembling and managing teams of investigators from a number of institutions
- Projects which involve extensive data accumulation, analysis and entry, surveying, tabulation, cataloging, searching literature, and reporting (such as epidemiological studies, clinical trials, and retrospective clinical records studies)
- Projects that require making travel and meeting arrangements for large numbers of participants, such as conferences and seminars
- Projects whose principal focus is the preparation and production of manuals and large reports, books and monographs (excluding routine progress reports)
- Projects that are geographically inaccessible to normal departmental administrative services, such as research vessels, radio astronomy projects, and other research fields sites that are remote from campus
• Individual projects requiring project-specific database management; individualized graphics or manuscript preparation; human or animal protocols; and multiple project-related investigator coordination and communications

The following items, as noted in A-21, F.6.b, are usually treated as F&A costs, however such costs may also be treated as direct costs under a Major Project: office supplies, postage, basic local telephone services on campus (including phone installation, monthly line charges, basic instruments), and memberships.

If it is determined that these costs are appropriately budgeted as direct costs, the certification statement page (See Attachment 1) must be filled out, signed and uploaded into the REX form. Also, the PI must state within the budget justification of the proposal: “The (name the type of cost(s) here, e.g. admin. assistant salary/benefits, postage, etc.) cost(s) meets the A-21, Exhibit C Major Project or Activity classification due to the following unlike circumstances of the proposed project: (list specific reasons why the project is considered a “Major Project or Activity”).”

(Back to Table of Contents)

CHARGING F&A COSTS AS DIRECT COSTS ON NONFEDERAL PROJECTS

Costs that are normally F&A costs may be charged to nonfederal sponsored agreements if permitted by the sponsors' policies/practices or otherwise approved by sponsors. If a nonfederal sponsor does not allow for F&A costs, or allows for a reduced F&A cost rate than WSU’s federally negotiated rate, a Principal Investigator may budget the following items to direct costs if allowed by the agency:
Administrative Assistants and/or Support Staff
Office supplies
Postage
Basic local telephone services on campus (basic services include phone installation, monthly line charges, and basic instruments)
Memberships

(Back to Table of Contents)

FACILITIES & ADMINISTRATIVE COSTS (F&A)

F&A Rates. The University F&A cost rates are calculated on the basis of criteria specified by the United States Office of Management and Budgets and are verified each fiscal year by the auditors of the Federal government. Normal F&A Cost rates will generally be applied on all proposals unless the funding agency prohibits F&A Costs or limits F&A to a specific rate. In addition, renewal proposals to external agencies must request full F&A cost reimbursement to the university, regardless of the rate in place at the time of the original agreement, assuming the federally negotiated F&A rate is accepted by the agency. The following rates are effective for the time period of 7/1/07-6/30/10:

The Organized Research On-Campus Rate is 49.5% MTDC
The Organized Research Off-Campus Rate is 26% MTDC
The On-Campus Instruction Rate is 55% MTDC
The Off-Campus Instruction Rate is 26% MTDC
The On-Campus Other Sponsored Activity Rate is 33% MTDC
The Off-Campus Other Sponsored Activity Rate is 26% MTDC

Note: BPPM 40.25, Facilities and Administrative Costs, contains additional information explaining these costs if further inquiry is necessary.

B. Determining On vs. Off Campus F&A Rates:

In cooperation with the WSU F&A Rate Agreement:

**On-Campus:** A project is considered on-campus if the activity is conducted in any facility owned and/or leased by the University and direct costs are associated with maintenance and use of the physical plant and libraries.

**Off-Campus:** Per the WSU F&A Rate Agreement, a project is considered off-campus if the activity is conducted at locations other than in University owned or operated facilities and indirect costs associated with physical plant and library are not considered applicable to the project.

Where a project supported by a single grant or contract is conducted at two or more physical locations (split between on and off campus facilities), the following principles should normally be observed for determining the appropriate F&A Cost Rate:

Where the total annual amount (direct costs only) of the grant or contract is less than $250,000, a single F&A cost rate will be applied. This rate will be the one currently applicable where the preponderance (more than 50% of project salaries, wages and benefits) of effort contributed is accomplished.

Where the total annual amount (direct costs only) of the grant or contract is $250,000 or greater, provision should be made for use of appropriate rates to be applied to project costs at each location. Using the salaries, wages, and benefits as a basis for applying the rates to the other MTDC project costs, the rates can then be applied to MTDC project costs at each location.

C. MTDC (Modified Total Direct Costs). MTDC are the direct costs less the following:

- Equipment items costing $5,000 or more per item
- Alteration and renovation costs
- Costs over $25,000 for each subcontract. F&A costs are at the same F&A rate as the proposal on the first $25,000 of each subcontract only.
- Qualified Tuition Reduction
- Patient Care
- Off-Site Facility Rental
- Scholarships/Fellowships (paid as stipends under budget object 08)
- Stipends/Participant Support Costs

**Stipends.** Stipends should be paid using the Non-Services Pay Form (BPPM Form 30.30.6).
**Participant Support Costs.** Participant Support Costs should be paid via State of Washington Invoice Voucher (http://www.ecy.wa.gov/services/contract/a19-1a.doc) using object code 03PZ to insure F&A costs are not attributed to this expense.

Make sure to code all participant support costs as 03PX; Participant Support Costs coded as 03AA will be charged F&A.

Some agencies such as the National Science Foundation (NSF) do not allow F&A costs charged to training costs for activities such as symposium, seminars or workshops; these items should be charges as participant support costs. If in doubt, check with OGRD (509.335.9661)

**D. F&A Waiver**

(1) F&A Waivers requested prior to proposal submission or post-award are reviewed and approved by either the Director of OGRD or the Vice President for Research.

Requests should normally be routed via the Unit Chair or Director and the Associate Dean (or delegate) or Vice Chancellor responsible for research and scholarship activities of that Area/College/Campus.

Note: F&A costs are extremely important to the University as they support the research infrastructure; WSU Central Administration expects full F&A reimbursement for all sponsored projects unless the exception criteria is met as noted above. Therefore, F&A waiver requests are not often approved and substantive justification must be provided for waiving F&A to industrial sponsors and foreign governments. OMB Circular A-21, Cost Principles for Educational Institutions, under section G(1)(a)(3) communicates that “Each Institution’s F&A cost rate process must be appropriately designed to ensure that Federal sponsors do not in any way subsidize the F&A costs of other sponsors, specifically activities sponsored by industry and foreign government.”

This approval can only be granted by the central administration through the OGRD. Questions should be directed to the OGRD at 509.335.9661.

**E. F&A Rate Policy Exceptions:**

**Agency Restriction of F&A:** All sponsored programs are to include facilities and administrative costs at the rates as approved by DHHS and listed above for on and off campus activities with the exception of federal and non-federal sponsors that publish a rate that cannot be exceeded and is followed by all institutions submitting to that source of funds. This information will be found in printed sponsor guidelines or procedures and may vary from program to program within a sponsor. Consideration will be given on WSU’s ability to support those un-recovered costs prior to the submission of the proposal or request for funding. Please see “Charging F&A Costs as Direct Costs on Nonfederal Projects” for additional information.

Note: Except as provided otherwise by sponsor regulations, F&A costs on flow-through funds must be included at the appropriate F&A rate.

**Construction Projects:** F&A is waived on construction costs.
USDA F&A Rate determination calculator: Most USDA funding requires (See USDA guideline below) WSU to use the lower of a rate indicated by USDA or WSU’s appropriate rate. To help determine which rate is lower, a calculator is provided at http://www.ogrd.wsu.edu/guidelines.asp. Please use the calculator to determine which rate should be applied to the project budget prior to submitting your proposal to OGRD.

Please note USDA-NIFA Indirect Costs:
Section 7132 of the Food, Conservation, and Energy Act amended section 1462 of the National Agricultural Research, Extension, and Teaching Policy Act of 1977 (7 U.S.C. 3310) on recovery of indirect costs. The recovery of indirect costs on awards made by NIFA under this program area may not exceed the lesser of the institution’s official negotiated indirect cost rate or the equivalent of 22 percent of total Federal funds awarded.

NIH Special requirements: In some cases, such as with projects which require the purchase of Genomic Arrays, NIH requires the purchase of such GA’s to be subcontracted rather than being purchased as a good or supply. Be sure to consider any special budgeting requirements when developing your proposal budget. Example: http://grants.nih.gov/grants/guide/notice-files/NOT-OD-10-097.html

COST SHARING

A. If Cost Sharing is in the proposal, an obligation will be set up at the time the award is set up. Documentation will be required. Every effort should be made to meet the obligation within the grant period. Grants whose cost sharing obligation has not been met may be subject to reduction by the agency.

B. If Cost Sharing obligations are not required, they should not be listed on the budget page and should not have a dollar value assigned in the narrative. Lab space should not be shown as a WSU contribution. Be sure you are not over-committing a person’s time beyond 100% effort; if a person is being paid 100% on other projects and that situation will not be changing, do not commit him/her for additional effort unless it is clearly shown and stated as extra compensation and has been approved as such prior to proposal submission. As a general rule, cost share the minimum amount required by the agency. Cost share that is not required by the agency however and is listed on the REX and/or in the budget and/or in the proposal project description is considered voluntary committed cost share. Voluntary committed cost share is not recommended, therefore must be approved by departmental heads through signatures provided on the REX form and will be tracked and accounted for by Sponsored Programs. Voluntary committed cost share is reviewed in our audit processes.

NOTE: NSF prohibits the inclusion of voluntary committed cost sharing.

C. If you are asked to include Other Support not to be considered as committed cost sharing by WSU, please include the following statement within the body of your proposal or budget narrative:

“WSU is including in this proposal, the following information on other resources available which are in support of similar research/activities undertaken by the Principal
Investigator (PI). These resources are listed to identify other support for this research/activity and are not included as a commitment of cost-share by WSU.”

D. Using federal dollars as matching or Cost Sharing toward another federal project is not allowed unless you have written authorization from both the cost-sharing federal agency and the funding agency prior to submission of the proposal.

Unrecovered or “waived” F&A Costs on the grant portion due to a lower agency allowable F&A rate can generally be claimed as Cost Sharing. F&A Charges on the Cost Share direct costs may also be used as unrecovered cost share unless specifically not permitted by the sponsor. Waived and/or unrecovered F&A costs should be shown separately on the budget.

Note: Unrecovered F&A is defined as F&A that would have been recuperated if not for the sponsors’ policy to not allow for those expenses to be reimbursed.

F. It is highly encouraged that an investigator not offer university cost sharing in categories other than salaries. Since cost sharing is auditable, it must be possible to document without excessive record keeping. Normally the salary of the Principal Investigator and/or other University staff pledged to the project, with related employee benefits and F&A costs, is more than sufficient to show an acceptable level of cost-sharing.

For the purpose of this Memorandum a distinction is made between “cost-sharing” as discussed and “matching costs.” Matching costs are commitments by the University to spend its funds in a certain proportion to funds provided from the granting agency. Normally this commitment is required in equipment or facility grants. Funds so committed are monies which would not otherwise be spent for this purpose in contrast with faculty or staff salaries pledged to a project as “cost sharing.”

G. Third-party cost sharing/matching commitments must be in writing, incorporated into the proposal, and signed off by an authorized representative from the entity committing the cost share/match amount. In certain situations, WSU may require cost share agreements with third-party agencies committing funding.

H. Below is a list of examples of suggested cost share items:
   1. Cash commitments from Departments, Colleges, and Organized Research.
      a. Straight equipment match
      b. Purchase of other new equipment
      c. Replacement parts and maintenance contracts
   2. Graduate Research Assistantships (includes fringe and F & A)
   3. Graduate student tuition waivers
   4. Graduate Teaching Assistantships
   5. Salaries, wages, benefits, and F & A for Faculty time
   6. Renovation of facilities
   7. Third party funding applied for or received
   8. Discounted prices on equipment or instrumentation
   9. Potential cost share of space lease costs (if it is off-campus)

ADDITIONAL INFORMATION

FTE and Grant Assignments
It should be noted that when a faculty FTE, or portion thereof, is vacant due to appointment to a grant budget, the FTE is NOT lost to the department as a permanently budgeted position. The salary equivalent goes to the accruals account each month that the position is vacant. The area has these funds at its disposal for equivalent part-time faculty appointments or conversion to temporary assistantships, to time-slip funds, or other budget categories. This benefit is provided to the areas to encourage extramural funding. The Area Finance Officer for each area should be consulted for details.

Working with Foreign Entities
When budgeting for projects that will include collaborators or agencies from foreign entities there are specific requirements that need to be considered. Some of these considerations include hazardous pay and high risk insurance. To ensure that all of these aspects are reviewed please follow the budgeting links at www.ogrd.wsu.edu/foreignbudgeting.asp.

Rental of Non-University Space
You may need to contact Business Affairs for information related to rental of non-university space when required.

“Miscellaneous” and “Contingency” categories should be avoided on the budget page.

Revision of budgets and of the scope of work to be conducted for a proposed project is often requested by the external agency. All such revisions, including cost-sharing and matching costs are subject to the same review and require the same authorization as the original proposal. In fact, this review is of greater importance than at the time of submittal because it is at this point where a decision must finally be rendered as to the acceptance of the grant or contract.

BPPM 40.09, Cost Determination Guidelines, is another excellent resource for proposal budget development.

SUMMARY BUDGET JUSTIFICATION INFORMATION

Estimated Inflation Factors:

FACULTY/ADMIN PROFESSIONAL/GRA = 4% each July 1
CLASSIFIED STAFF = 4% each July 1 + Applicable PID
QUALIFIED TUITION REMISSION = 5% each year (Go to QTR for more information on special circumstances where inflation is >5%)
GRA HEALTH INSURANCE = 4% each year

Note: please use the appropriate inflation factor for the appropriate NIH institute as noted in the announcement/RFP.
FACILITIES & ADMINISTRATIVE Costs—a.k.a. F&A/INDIRECT COSTS/OVERHEAD:
Note: the rates listed below are the DHHS Federally Negotiated Rate approved 2/25/10 effective 7/1/07-6/30/10 Note: As of June 30, 2010, WSU is under a provisional rate agreement which allows WSU to use the previously negotiated agreement.

On-Campus Organized Research – 49.5% MTDC
Off-Campus Organized Research – 26% MTDC
On-Campus Instruction – 55% MTDC
Off-Campus Instruction – 26% MTDC
On-Campus Other Sponsored Activity – 33% MTDC
Off-Campus Other Sponsored Activity – 26% MTDC

DIRECT COSTS include all charges directly allowable, reasonable and allocable to a sponsored project. Direct costs include, but are not limited to, the following: salaries and wages, fringe benefits, materials and supplies, travel, the first $25,000 of each subcontract, equipment, participant support costs, consultant charges, and purchased services.

MTDC (Modified Total Direct Costs) are defined as direct costs with the exception of the following exclusions: capital equipment, capital expenditures (remodel costs, etc), charges for patient care, qualified tuition reduction, rental costs from off-site facilities, scholarships, fellowships (stipends), portion of each subcontract exceeding the first $25,000, participant support costs.

ATTACHMENT 1: CERTIFICATION OF A MAJOR PROJECT

The proposal application entitled __________________________________________
being submitted to ____________, a federal agency, proposes a budget where costs that
are typically treated as F&A costs have been budgeted as direct costs.

These costs are being directly charged to the federal sponsor because they meet the
following WSU Cost Determination Guidelines in BPPM 40.09:

The project has a special need for the item or service involved that is beyond the level of
services normally provided.
The costs can be specifically identified to the work conducted under the project.
The costs are specified in the proposed budget of the sponsored agreement, and the
special circumstances requiring direct charging are justified in the proposal.
The sponsoring agency accepts the cost as part of the project’s direct cost budget; i.e.,
the sponsor does not specifically disapprove the cost in the award or in other notices it
gives to the University.

Also, per OMB Circular A-21, the proposed project meets the definition of a “Major
Project or Activity”.
