Statement of Interest
I am excited to be considered as a candidate for NCURA’s Regional Advisory Committee (RAC). I have been a member of NCURA since 1998 and have actively volunteered since 2006. Being a member of Region VI has given me the opportunity to give back the wealth of resources and information that NCURA has given me throughout the years. Being an elected member of the RAC will enable me to say thank you and represent the next generation of Region VI. If elected, I would assist the region’s officers in developing activities and programs that are consistent with the goals and objectives of the National organization and the regional membership. I look forward to coming together, sharing together, working together and succeeding together to make the region as prosperous as possible.
