According to the records in this office you are a Principal Investigator for the "subject" award. WSU is required to report to the sponsor all inventions, either conceived or reduced to practice, arising from the work. An "Invention" is any new and useful process, machine, article of manufacture or composition of matter, or any novel variety of plant, conceived or reduced to practice in the performance of work under the subject funding agreement. Conception is "the formation of a complete mental picture of the claimed invention." Reduction to Practice is either making and testing the invention to determine that it works or "filing a patent application claiming the invention." Please complete the following:
